Independent Auditors' Review Report

To the Board of Directors of Taisun Enterprise Co., Ltd.:

Introduction

We have reviewed the accompanying consolidated balance sheets of Taisun Enterprise Co., Ltd. and its subsidiaries as of June 30, 2021 and 2020, and the related consolidated statements of comprehensive income for the three months and six months ended June 30, 2021 and 2020, as well as the changes in equity and cash flows for the six months ended June 30, 2021 and 2020, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, " Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the Basis for Qualified Conclusion paragraph, we conducted our reviews in accordance with Statement of Auditing Standards 65, "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of the consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the generally accepted auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As stated in Note 4(b), the consolidated financial statements included the financial statements of certain non-significant subsidiaries, which were not reviewed by independent auditors. These financial statements reflect total assets amounting to $188,964 thousand and $199,270 thousand, constituting 1.77% and 2.18% of consolidated total assets as of June 30, 2021 and 2020, respectively, total liabilities amounting to $76,996 thousand and $74,803 thousand, constituting 2.34% and 2.88% of consolidated total liabilities as of June 30, 2021 and 2020, respectively, and total comprehensive income amounting to $1,112 thousand, $3,523 thousand, $2,891 thousand and $6,130 thousand, constituting 0.70%, 1.45%, 0.88% and 1.71% of consolidated total comprehensive income for the three months and six months ended June 30, 2021 and 2020, respectively.

Furthermore, as stated in Note 6(h), the other equity accounted investments of Taisun Enterprise Co., Ltd. and its subsidiaries in its investee companies of $4,652 thousand and $4,637 thousand as of June 30, 2021 and 2020, respectively, and its equity in net earnings on these investee companies of $0 thousand, $0 thousand, $0 thousand and $0 thousand for the three months and six months ended June 30, 2021 and 2020, respectively, were recognized solely on the financial statements prepared by these investee companies, but not reviewed by independent auditors.

KPMG, a Taiwan partnership and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Qualified Conclusion

Except for the adjustments, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and equity accounted investee companies described in the Basis for Qualified Conclusion paragraph above been reviewed by independent auditors, based on our reviews and the review reports of other auditors (please refer to Other Matters paragraph), nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of Taisun Enterprise Co., Ltd. and its subsidiaries as of June 30, 2021 and 2020, and of its consolidated financial performance for the three months and six months ended June 30, 2021 and 2020, and its consolidated cash flows for the six months ended June 30, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Other Matters

We did not review the financial statements of associates, which represented investments in other entities accounted for using the equity method. Those financial statements were reviewed by other auditors, whose review reports have been furnished to us, and our conclusion, insofar as it relates to the amounts included for associates, is based solely on the review reports of other auditors. The investments in associates accounted for using the equity method amounting to $3,536,845 thousand and $3,417,875 thousand, constituting 33.19% and 37.47% of consolidated total assets as of June 30, 2021 and 2020, respectively, and the related share of profit of associates accounted for using the equity method amounting to $87,512 thousand, $144,070 thousand, $175,478 thousand and $214,907 thousand, constituting 63.67%, 60.82%, 54.49% and 56.73% of consolidated total profit before tax for the three months and six months ended June 30, 2021 and 2020, respectively.

The engagement partners on the reviews resulting in this independent auditors' review report are Hsin-Ting Huang and Kuo-Yang Tseng.

For related information, please refer to Note 6(y) of the consolidated financial statements for the year ended December 31, 2020.

(i) Credit risk

1) Credit risk exposure

The carrying amount of financial assets represents the maximum amount exposed to credit risk.

(Continued)

2) Concentration of credit risk

As at June 30, 2021, December 31, 2020 and June 30, 2020, the Group reviewed the concentrations of credit risk arising from its biggest customer-CENTRAL UNION OIL CORP., and it was below 23.77%, 22.35% and 20.03%, respectively, of the accounts receivable.

3) Accounts receivable of credit risk

For credit risk exposure of notes and accounts receivables, please refer to note 6(d). Other financial assets at amortized cost includes other receivables and time deposits, etc.

All of these financial assets are considered to be low risk, and thus, the impairment provision recognized during the period was limited to 12 months expected losses. Please refer to Note 6(e) for the movement of allowance for loss.

(iii) Currency risk

1) Exposure of foreign currency risk

The Group's significant exposure to foreign currency risk is as follows:

	June 30, 2021			December 31, 2020			June 30, 2020		
	Foreign Currency	Exchange Rate	NTD	Foreign Currency	Exchange Rate	NTD	Foreign Currency	Exchange Rate	NTD

USD : CNY	2,000	6.461	55,740	2,000	6.539	57,017	3,500	7.07	103,811

2) Sensitivity analysis

The Group's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, other financial assets-current, accounts receivable, other receivables and borrowings that are denominated in foreign currency. A 1% appreciation or depreciation of US dollar against New Taiwan dollar as of June 30, 2021 and 2020 would have increased (decreased) the pre-tax net income for the six months ended June 30, 2021 and 2020 by $2,107 thousand and $988 thousand, respectively. The analysis assumes that all other variables remain constant. The analysis is performed on the same basis for both periods.

3) Foreign exchange gains or losses on monetary item

Since the Group has various kinds of functional currency, the information on foreign exchange gain (loss) on monetary items is disclosed by the total amount. For the three months and six months ended June 30, 2021 and 2020, the foreign exchange (loss) gain (including realized and unrealized portions) amounted to $2,795 thousand, $3,705 thousand, $6,408 thousand and $5,008 thousand, respectively.

(iv) Interest rate analysis

Please refer to the notes on liquidity risk management and interest rate exposure of the Group's financial assets and liabilities.

	Book value		
	June 30, 2021	December 31, 2020	June 30, 2020
Fixed rate instruments:			
Financial assets	$ 170,010	158,809	164,741
Financial liabilities	750,000	20,000	350,000
	$ (579,990)	**138,809**	**(185,259)**
Variable rate instruments:			
Financial assets	$ 854,960	728,575	463,142
Financial liabilities	960,386	748,027	454,033
	$ (105,426)	**(19,452)**	**9,109**

The following sensitivity analysis is based on the risk exposure to interest rates on the derivative and non-derivative financial instruments at the reporting date. For variable rate instruments, the sensitivity analysis assumes the variable rate liabilities are outstanding for the whole year at the reporting date. The report of the Group' s internal management on the increases/decreases in the interest rates and the exposure to changes in interest rates of 0.5% is considered by the management to be a reasonable change of interest rate.

If the interest rate increases / decreases by 0.5%, the Group' s net income will decrease /increase by $211 thousand and $18 thousand for the six months ended June 30, 2021 and 2020 , respectively, assuming all other variable factors remaining constant. This is mainly due to the Group's floating interest rate of cash in bank and borrowing factoring.

Notes to the Consolidated Financial Statements

(v) Other market price risk

If the equity price changes, the impact of equity price change to other comprehensive income will be as follows; assuming the analysis is based on the same basis for both years and assuming that all other variables considered in the analysis remain constant:

	For the six months ended June 30			
	2021		2020

2) Valuation techniques for financial instruments not measured at fair value:

The assumptions and methods used in valuing financial instruments that are not measured at fair value are as follows:

a) Financial assets and liabilities measured at amortized cost

Fair value measurement for financial assets and liabilities is based on the latest quoted price and agreed-upon price if these prices are available in an active market. When market value is unavailable, fair value of financial assets and liabilities are evaluated based on the discounted cash flow of the financial assets and liabilities.

(Continued)

3) Valuation techniques for financial instruments measured at fair value:

a) Non-derivative financial instruments

Financial instruments trade in active markets is based on quoted market prices.

If a quoted price of a financial instrument can be obtained in time and often from exchanges, brokers, underwriters, industrial union, pricing institute, or authorities and such price can reflect those actual trading and frequently happen in the market, then the financial instrument is considered to have a quoted price in an active market. If a financial instrument does not accord with the aforementioned definition, then it is considered to be without a quoted price in an active market. In general, market with low trading volume or high bid-ask spreads is an indication of a non-active market.

If the financial instruments held by the Group have an active market, the measurements of fair value are categorized as follows:

- The listed stocks and beneficiary certificate-open-end funds are recognized as financial assets and liabilities traded in active markets by the standards and nature. The fair value is measured at the market quoted price.

Measurements of fair value of financial instruments without an active market are based on valuation technique or quoted price from competitor. Fair value measured by valuation technique can be extrapolated from similar financial instruments, discounted cash flow method or other valuation technique which include model calculating with observable market data at the balance sheet date.

If the financial instruments held by the Group have no active market, the measurements of fair value are categorized as follows:

- Equity instruments without quoted price: The fair value is measured at net asset value method. By looking through the nature and the included items of each asset and liability item and collecting the market value information of each asset and liability for items whose book value may be different from the fair value, the Group needs to obtain the fair value of the Company's net assets, and calculate the Company's equity value. The discount effect is adjusted due to lack of market liquidity in equity securities.

b) Derivative financial instruments

These are based on the valuation model accepted by the most market users, ex: discount rate and option pricing model. Forward exchange agreement is usually based on the current forward rate.

Fair value of structured financial instruments is based on appropriated valuation model, ex: Black-Scholes model, or other valuation model, ex: Monte Carlo simulation.

(Continued)

c) Financial instruments measured at fair value

The Group uses market-observable inputs as much as possible to measure its assets and liabilities. The different levels, wherein the inputs of valuation techniques are used to measure the fair value of financial and non-financial instruments have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Unobservable inputs for the asset or liability.

4) Transfers between Level 1 and Level 2

There were no changes in the valuation techniques for fair value for the six months ended June 30, 2021 and 2020. In addition, there have been no transfers from each level for the six months ended June 30, 2021 and 2020.

5) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's financial instruments that use Level 3 inputs to measure fair value include financial assets measured at fair value through other comprehensive income-equity investments.

The Group's equity instrument investments without an active market in Level 3 have more than one significant unobservable inputs. The significant unobservable inputs of financial instrument investments without an active market are individually independent, and there is no correlation between them.

Quantified information of significant unobservable inputs was as follow:

Item	Valuation technique	Significant unobservable inputs	Interrelationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through other comprehensive income-equity investments without an active market	net asset value method	·net asset value ·Market illiquidity discount (as of June 30, 2021, December 31, 2020 and June 30, 2020 were 25%)	· Not applicable · The estimated fair value would increase (decrease) if the market illiquidity discount were lower (higher)
Financial assets at fair value through profit or loss-equity investments without an active market	net asset value method	·net asset value ·Market illiquidity discount (as of June 30, 2021, December 31, 2020 and June 30, 2020 were 25%)	· Not applicable · The estimated fair value would increase (decrease) if the market illiquidity discount were lower (higher)

(Continued)

6) Fair value measurements in Level 3 – sensitivity analysis of reasonably possible alternative assumptions

The Group' s measurement on the fair value of financial instruments is deemed reasonable despite different valuation models or assumptions may lead to different results. For fair value measurements in Level 3, changing one or more of the assumptions would have the following effects on profit or loss and other comprehensive income：

	Inputs	Fluctuation in inputs	Profit or loss		Other comprehensive income	
			Favorable	Unfavorable	Favorable	Unfavorable
June 30, 2021						
Financial assets at fair value through other comprehensive income						
Equity investments without an active market	Market illiquidity discount	1%	$ -	-	210	(210)
December 31, 2020						
Financial assets at fair value through other comprehensive income						
Equity investments without an active market	Market illiquidity discount	1%	$ -	-	193	(193)
June 30, 2020						
Financial assets at fair value through other comprehensive income						
Equity investments without an active market	Market illiquidity discount	1%	$ -	-	137	(137)

The favorable and unfavorable effects represent the changes in fair value, and fair value is based on a variety of unobservable inputs calculated using a valuation technique. The analysis above only reflects the effects of changes in a single input, and it does not include the interrelationships with another input.
